Data element attributes

Collection and usage attributes

Collection methods: This triage classification is to be used in the emergency departments of hospitals. Patients will be triaged into one of five categories on the Australasian Triage Scale according to the triageur's response to the question: 'This patient should wait for medical care no longer than ...?'.

The triage category is allocated by an experienced [registered nurse](#) or medical practitioner. If the triage category changes, both triage categories can be captured, but the original category must be reported in this data element.

A triage category should not be assigned for patients who have a Type of visit of 'Dead on arrival, emergency department clinician certified the death of the patient'.
