Property attributes

Identifying and definitional attributes

Property:	Number of visits to a website
METEOR identifier:	481080
Registration status:	Health! , Standard 13/11/2014
Definition:	A count of visits to a website.

A website visit is a series of page requests from a uniquely identified user of a website within one session. A session ends when more than 30 minutes has elapsed between each page request.

A visit count provides a reliable measure of overall traffic to a website by indicating how many people are accessing pages within and across the website within one session.

Note that a visit can consist of one page view, or many page views.

Property group:	Service provision event
