Prisoner health NBEDS

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 482311

Registration status: [Health!](#), Standard 28/04/2016

DSS type: Data Set Specification (DSS)

Scope: The Prisoner health National Best Endeavours Data Set (NBEDS) defines data collected from all public and private prisons throughout Australia on prison entrants, prisoners who visit a prison clinic, prisoners who are taking prescription medication while in custody, prison clinic services and staffing levels, and prison dischargees. The data are used to report against the National Prisoner Health Indicators, assist in monitoring the health of prisoners and inform prisoner health service planning and delivery.

In the National Prisoner Health Data Collection public and private prisons include those administered by Corrective Services departments, including correctional facilities and remand centres. Excluded from the collection are periodic detention centres, court and police cells, juvenile detention centres, immigration detention centres, secure psychiatric facilities, military prisons, and home detention programs.

The Prisoner health NBEDS contains five component data set specifications:

Prison entrants NBEDS: defines data on all prisoners entering prison in the National Prisoner Health Data Collection period. This includes demographics, mental health, chronic diseases, alcohol and other drug use, use of health services and pregnancy.

Prison clinic contact NBEDS: defines data from all visits by prisoners to the prison clinic during the National Prisoner Health Data Collection period regarding the number of clinic contacts each prisoner made and the reason for clinic attendance.

Prisoners in custody prescription medications NBEDS: defines data on the category of prescription medications administered to prisoners on one day during the National Prisoner Health Data Collection period.

Prison establishments NBEDS: defines data provided by prison clinic management regarding the services provided by prison clinics.

Prison dischargee NBEDS: defines data on all prisoners who are going to be discharged from the prison system in the following 4 weeks from the date of data collection, during the National Prisoner Health Data Collection period. This includes demographics, mental health, chronic diseases, alcohol and other drug use, use of prison clinics and services accessed in prison.
