## Collection and usage attributes

<b>Computation description:</b>	Elective surgery as defined in the Elective Surgery Waiting Times (removals and census) National Minimum Data Sets (NMDSs).  Waiting time is as defined in <a href="#">Waiting time at removal from elective surgery waiting list</a> . Calculated by jurisdictions by subtracting the listing date for care from the removal date, minus any days the patient was waiting with a less urgent clinical urgency category than their clinical urgency category at removal.  Waiting times are calculated for patients whose reason for removal was: <ol style="list-style-type: none"><li>1. <i>Admitted as an elective patient for awaited procedure by or on behalf of this hospital or the state/territory</i></li><li>2. <i>Admitted as emergency patient for awaited procedure by or on behalf of this hospital or the state/territory</i></li></ol> For the purposes of reporting, patients are reported as the final urgency category they were when treated. When a patient's urgency category changes, existing NMDS business rules will apply.  Analysis by state and territory based on location of service.  Presented as a percentage.					
<b>Computation:</b>	100 x (Numerator ÷ Denominator)
