Establishment—number of individual session nonadmitted patient service events

Identifying and definitional attributes

Metadata item type: Data Element Concept

Synonymous names: Number of individual service events

METEOR identifier: 497975

Registration status: Independent Hospital Pricing Authority, Standard 31/10/2012

Health!, Superseded 13/11/2014

Definition: The number of individual session <u>non-admitted patient service events</u> provided by

an establishment.

Context: Required to adequately describe the services provided to non-admitted patients.

The resources required to provide services to groups of patients are different from those required to provide services to an equivalent number of individuals. Hence services to groups of non-admitted patients or outreach clients should be counted

separately from services to individuals.

Object Class attributes

Identifying and definitional attributes

Object class: Establishment

Definition: Institutions, organisations or the community from which health services are

provided. The term establishment covers conventional health establishments and

also organisations which may provide services in the community.

Specialisation of: Organisation
