Service type outlet—average full-time equivalent staff (paid), N[NNN(.N)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Average full-time equivalent paid staff
METEOR identifier:	498103
Registration status:	Community Services (retired) , Standard 10/04/2013 [Non Dictionary] Disability , Standard 13/08/2015
Definition:	The average full time equivalent staff units for all paid staff.
Data Element Concept:	Service type outlet—full-time equivalent staff
Value Domain:	Average full-time equivalent staff N[NNN(.N)]

Value domain attributes

Representational attributes

Representation class:	Average
Data type:	Number
Format:	N[NNN(.N)]
Maximum character length:	5
Unit of measure:	Full-time equivalent (FTE) staff

Data element attributes

Collection and usage attributes

Guide for use: The ordinary time hours normally worked may differ according to the type of work. The hours under the relevant award or agreement should be used if known. If the relevant award or agreement staff hours for an occupation is not known, or the staff person is undertaking a variety of tasks, 38 hours per week should be used as a substitute.

Example:

A direct service worker provides 10 hours of care over a week. The relevant award specifies that a full time worker usually works 38 hours in a week.

Full time equivalent staff units = $10/38 = 0.263$ (for that person for a week) This number would then be added to the full time equivalent staff units for all other staff and the number rounded to one decimal place.

Collection methods: This metadata item is not intended to be a completely accurate calculation of staff hours, but a general indication of the number of paid hours an outlet is staffed.

This metadata item may be calculated over weeks, fortnights, months or an annual basis.
