## Data element attributes

### Collection and usage attributes

**Guide for use:** CODE 1 Yes  
To be reported if the woman has pre-existing, [gestational](#) or other diabetes during this pregnancy.

CODE 2 No  
To be reported if the woman does not have any form of diabetes during this pregnancy.

CODE 9 Not stated/inadequately described  
To be recorded by data entry personnel (state/territory health authority) if the data field is left blank or is inadequately completed in the perinatal data collection form or extract. Clinicians should not record code 9.

**Collection methods:** The diagnosis is preferably derived from, and substantiated by clinical documentation, which would be reviewed at the time of delivery. However, this information may not be available, in which case the patient may self-report to the clinician that they have been diagnosed with diabetes mellitus.
