Patient—teleotology review required indicator, yes/no code N

Exported from METEOR (AIHW's Metadata Online Registry)

Patient—teleotology review required indicator, yes/no code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Teleotology review required indicator
METEOR identifier:	505350
Registration status:	Indigenous, Standard 05/09/2014
Definition:	An indicator of whether a **teleotology** review is needed to provide more information about a patient's ear, nose and throat condition, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Patient—teleotology review required indicator
METEOR identifier:	505348
Registration status:	Indigenous, Standard 05/09/2014
Definition:	An indicator of whether a **teleotology** review is needed to provide more information about a patient's ear, nose and throat condition.
Object class:	Patient
Property:	Teleotology review required indicator

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no/not applicable/unknown/not stated/inadequately described code N
METEOR identifier:	442451
Registration status:	Early Childhood, Standard 07/06/2011 Community Services (retired), Standard 10/04/2013 Indigenous, Standard 11/08/2014 Health!, Standard 04/02/2015 Disability, Standard 13/08/2015
Definition:	A code set representing 'yes', 'no', 'not applicable', 'unknown' and 'not stated/inadequately described'.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

Value	Meaning

Permissible values:	1	Yes
	2	No
Supplementary values:	7	Not applicable
	8	Unknown
	9	Not stated/inadequately described

Source and reference attributes
