### Collection and usage attributes

<b>Guide for use:</b>	Record whether androgen deprivation therapy was used in the treatment of a person with prostate cancer.  Androgen hormones stimulate the growth of prostate cancer cells, and so the reduction of androgen hormones aims to reduce the spread of prostate cancer. This includes both chemical treatments, such as hormone agonists and antagonists, and surgical treatment, such as an orchiectomy.
<b>Collection methods:</b>	Collect from patient medical records.
