Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Agency workers may select multiple support services to meet the identified needs

of the client.

Comments: This information can be used to show the range of support services that agencies

> provide, and whether the needs of clients can be met either through direct service provision at the agency or through referrals to other services. This is important

information for service and program planning.

An unmet need is indicated where, a client has been identified as needing a support service, but the support has not been provided directly by the agency, and there has been no referral arranged to another service in order to receive services

that cannot be provided by the agency.
