Episode of admitted patient care—major diagnostic category, code (AR-DRG v 7) NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Major diagnostic category
METEOR identifier:	513997
Registration status:	Health! , Recorded 23/09/2014
Definition:	The category into which the patient's diagnosis and the associated Australian refined diagnosis related group (ARDG) falls, as represented by a code.
Data Element Concept:	Episode of admitted patient care—major diagnostic category
Value Domain:	Major diagnostic category code (AR-DRG v 7) NN

Value domain attributes

Representational attributes

Classification scheme:	Australian Refined Diagnosis Related Groups version 7
Representation class:	Code
Data type:	String
Format:	NN
Maximum character length:	2

Data element attributes

Collection and usage attributes

Comments:	This metadata item has been created to reflect the development of Australian refined diagnosis related groups (AR-DRGs) (as defined in the metadata item Episode of admitted patient care—diagnosis related group, code (AR-DRG v 7) ANNA) by the Commonwealth Department of Health and Ageing. Due to the modifications in the diagnosis related group logic for the AR-DRGs, it is necessary to generate the major diagnostic category to accompany each diagnosis related group. The construction of the pre-major diagnostic category logic means diagnosis related groups are no longer unique. Certain pre-major diagnostic category diagnosis related groups may occur in more than one of the 23 major diagnostic categories.
