Value Domain:	Yes/no code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Boolean	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No

Data element attributes

Collection and usage attributes

Guide for use:	This field will always be populated. CODE 1 Yes Follow-up is required. CODE 2 No Follow-up is not required. Where the date accuracy indicator is AAA, a response of 'No' should be recorded for this data element. Where a date accuracy indicator is not AAA, the user should indicate whether follow-up is required. For example, if the person does not know their exact birthday there is nothing to be gained in follow-up, while if the date was estimated because the person was not fully conscious and able to provide details, follow-up should always be undertaken.
