### Representational attributes

<b>Representation class:</b>	Text
<b>Data type:</b>	String
<b>Format:</b>	X[X(99)]
<b>Maximum character length:</b>	100

## Data element attributes

### Collection and usage attributes

- Guide for use:** The organisation or the individual can verify the validity of an electronic address either by use of the electronic address or by verifying the electronic address details.
- Collection methods:** If an individual has verified communication, the organisation in which they function should also be included.

### Source and reference attributes

- Submitting organisation:** Australian Institute of Health and Welfare.
- Reference documents:** Standards Australia 2014. AS 4846:2014 Person and provider identification in healthcare. Sydney: Standards Australia.

### Relational attributes

- Related metadata references:** See also [Address—electronic communication verification flag, code A Health!](#), Standard 05/10/2016
- Implementation in Data Set Specifications:** [Electronic address cluster Health!](#), Standard 05/10/2016
- Conditional obligation:**
- If the electronic communication type is verified the details of the individual or organisation responsible for the verification must also be collected.
