## Value domain attributes

## Representational attributes

<b>Classification scheme:</b>	<a href="#">Standard Australian Classification of Countries 2011</a>
<b>Representation class:</b>	Code
<b>Data type:</b>	Number
<b>Format:</b>	NNNN
<b>Maximum character length:</b>	4

## Collection and usage attributes

<b>Guide for use:</b>	<p>The Standard Australian Classification of Countries 2011 (SACC) is a four-digit, three-level hierarchical structure specifying major group, minor group and country.</p> <p>A country, even if it comprises other discrete political entities such as states, is treated as a single unit for all data domain purposes. Parts of a political entity are not included in different groups. Thus, Hawaii is included in Northern America (as part of the identified country United States of America), despite being geographically close to and having similar social and cultural characteristics as the units classified to Polynesia.</p>
-----------------------	--

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	This is the code representing the country in which the awarding institution is based and that has accredited the awarding institution, for example, medical degrees accredited by Australian universities and obtained in overseas campuses are considered to be Australian qualifications.
<b>Collection methods:</b>	It is recommended that both the country description and code be collected.
