# Emergency surgery

## Identifying and definitional attributes

**Metadata item type:** Glossary Item

**METEOR identifier:** 534125

**Registration status:** [Health!](#), Standard 12/06/2015  
[Tasmanian Health](#), Standard 01/12/2016

**Definition:** Emergency surgery is surgery to treat trauma or acute illness subsequent to an emergency presentation. The patient may require immediate surgery or present for surgery at a later time following this unplanned presentation. This includes where the patient leaves hospital and returns for a subsequent admission. Emergency surgery includes unplanned surgery for admitted patients and unplanned surgery for patients already awaiting an elective surgery procedure (for example, in cases of acute deterioration of an existing condition).

**Context:** Admitted patient care

## Collection and usage attributes

**Guide for use:** Surgery is defined as procedures listed in the surgical operations section of the Commonwealth Medicare Benefits Schedule.

Surgery is classified as either emergency surgery, [elective surgery](#) or [other surgery](#) on the basis of a patient's presentation and subsequent care (not by time periods to surgery).

## Source and reference attributes
