# Non-admitted patient DSS 2014-15

## Identifying and definitional attributes

**Metadata item type:** Data Set Specification

**METEOR identifier:** 548176

**Registration status:** [Health!](#), Superseded 13/11/2014

**DSS type:** Data Set Specification (DSS)

**Scope:** The scope of the Non-admitted patient DSS is non-admitted patient service events involving non-admitted patients in [activity based funded](#) hospitals.

The DSS is intended to capture instances of service provision from the point of view of the patient.

For the purpose of this DSS, a non-admitted service is a specialty unit or organisational arrangement under which a hospital provides non-admitted services.

The scope of the DSS includes:

All arrangements made to deliver non-admitted patient service events (not covered by the national minimum data sets listed below) to non-admitted patients:

- irrespective of location (includes on-campus and off-campus),
- whose treatment has been funded through the hospital, regardless of the source from which the hospital derives these funds. In particular, Department of Veterans' Affairs, compensable and other patients funded through the hospital (including Medicare ineligible patients) are included; and
- regardless of setting or mode.

Excluded from the scope of the DSS are:

All services covered by:

- the Admitted patient care NMDS,
- the Admitted patient mental health care NMDS,
- the Non-admitted patient emergency department care NMDS, e.g. all non-admitted services provided to admitted patients or emergency department patients are excluded; and
- service events which deliver non-clinical care, e.g. activities such as home cleaning, meals on wheels or home maintenance.

## Collection and usage attributes

**Statistical unit:** [Non-admitted patient service event](#)

**Guide for use:**

A non-admitted patient service event is defined as an interaction between one or more health care provider(s) with one non-admitted patient, which must contain therapeutic/clinical content and result in a dated entry in the patient's medical record.

**Counting rules:**

1. Non-admitted service events involving multiple health professionals are counted as one non-admitted patient service event.
2. Patients can be counted as having multiple non-admitted patient service events in one day, provided that every visit meets each of the criteria in the definition of a non-admitted patient service event.
3. Patient education services can be counted as non-admitted patient service events, provided that they meet the criteria included in the definition of a non-admitted patient service event.
4. Each patient attending a group session is counted as a non-admitted patient service event, providing that the session included the provision of therapeutic/clinical advice for each patient and that this was recorded using dated entry in each patient's medical record. A group flag is included in the NMDS to record this type of service event.
5. Telephone and other telehealth consultations can be counted as service events if they substitute for a face to face consultation, provided that they meet all the criteria included in the definition of non-admitted patient service event. A telephone/telehealth consultation is only counted as one non-admitted patient service event, irrespective of the number of health professionals/locations participating in the consultation.
6. Services provided to admitted and emergency department patients (including services provided by staff working in non-admitted services who visit admitted patients in wards or emergency departments, or other types of consultation and liaison services involving admitted or emergency department patients) are not counted as non-admitted patient service events.
7. Travel by a health professional is not counted as a non-admitted patient service event.
8. All non-admitted services that meet the criteria in the definition of non-admitted patient service events must be counted, irrespective of funding source (including Medicare Benefits Schedule) for the non-admitted service. A funding source flag is included in the NMDS.
9. For activity based funding purposes, services from stand-alone diagnostic services are not counted as non-admitted patient service events; these are an integral part of the requesting clinic's non-admitted patient service event.
10. Renal dialysis, total parenteral nutrition, home enteral nutrition and ventilation performed by the patient in their own home without the presence of a health care provider may be counted as a non-admitted patient service event, provided there is documentation of the procedures in the patient's medical record.

**Implementation start date:** 01/07/2014

**Implementation end date:** 30/06/2015

***DSS specific information:***

In the context of the Non-admitted patient DSS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data specification, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.

This field cannot be left blank.
