Specialised mental health service—number of seclusion events

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	558081
Registration status:	Health!, Standard 13/11/2014
Definition:	The number of **seclusion** events occurring within the reference period for a specialised mental health service.

Object Class attributes

Identifying and definitional attributes

Object class:	Specialised mental health service
Definition:	Specialised mental health services are those with a primary function to provide treatment, rehabilitation or community health support targeted towards people with a mental disorder or psychiatric disability. These activities are delivered from a service or facility that is readily identifiable as both specialised and serving a mental health care function.
Context:	Hospitals and community mental health establishments and residential mental health establishments.
Specialisation of:	Service/care event

Collection and usage attributes

Guide for use:	The concept of a specialised mental health service is not dependent on the inclusion of the service within the state or territory mental health budget. A service is not defined as a specialised mental health service solely because its clients include people affected by a mental disorder or psychiatric disability. The definition excludes specialist drug and alcohol services and services for people with intellectual disabilities, except where they are established to assist people affected by a mental disorder who also have drug and alcohol related disorders or intellectual disability. These services can be a sub-unit of a hospital even where the hospital is not a specialised mental health establishment itself (e.g. designated psychiatric units and wards, outpatient clinics).
