Submitting organisation:	National Perinatal Epidemiology and Statistics Unit
Origin:	National Maternity Data Development Project (AIHW and NPESU), Maternity Care Classification System subproject.

Data element attributes

Collection and usage attributes

Guide for use:	Report a permissible value indicating an additional service that is included specifically for remote or rural women in a model of maternity care. These additional services are provided for women who reside at a significant distance from a maternity service.
	CODE 1 Fly-in-fly-out clinicians
	This may include Medical Specialist Outreach Assistance Program (MSOAP) services or any maternity care clinician (midwife or doctor) who travels to a remote community from a metropolitan centre specifically to provide antenatal/postnatal care.
	CODE 2 Telehealth
	This code is for any model of care that includes visits with a clinician via telehealth technology.
	CODE 3 Community-based remote-area clinicians
	This code is for models of care where remote-area nurses, midwives and or doctors provide care to women in their local community.
Collection methods:	Data are gathered using the Maternity Care Classification System (MaCCS) data collection questionnaire on an annual basis by every maternity service when classifying their models of care or when a new model of care is introduced.
