# Cancer treatment—radiotherapy fractions administered

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 561461

**Registration status:** Health!, Standard 08/05/2014

**Definition:** The total number of <u>radiotherapy</u> sessions (fractions) administered during the

course of treatment for cancer.

## **Object Class attributes**

### Identifying and definitional attributes

Object class: <u>Cancer treatment</u>

METEOR identifier: 559305

Registration status: Health!, Standard 08/05/2014

**Definition:** The course of cancer-directed treatment or treatments, with defined dates of

commencement and cessation, given to the patient by a treatment provider or team

of providers.

This may include cancer-directed surgical treatment, radiation therapy and systemic agent therapy for cancer. It applies to the primary course of cancer treatment, treatment administered to the patient in response to disease progression or treatment administered to the patient in response to disease

recurrence.

Specialisation of: Service/care event

# **Property attributes**

## Identifying and definitional attributes

Property: Radiotherapy fractions administered

METEOR identifier: 393508

Registration status: Health!, Standard 07/12/2011

**Definition:** The number of radiotherapy fractions or treatment sessions administered.

Radiotherapy is the treatment of disease by means of ionizing radiation.

Administration of the total dose of radiation is spread out over time and delivered to the patient in a number of even parts or treatment sessions (fractions). Although a treatment session may include several treatment portals delivered within a confined period of time, usually a few minutes, it is still considered one fraction.

Property group: Service provision event
