Definition:	A person who has been diagnosed with a cancer.
Specialisation of:	Person/group of persons

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Property attributes

Identifying and definitional attributes

Property:	Date of late effect
Definition:	The date on which a late effect appears after the acute stage of a disease or condition has resolved. This may be as a result of the treatment, the disease process, or both.
	A late effect is a persistent complication, disability or adverse outcome that appears after the acute stage of a disease has resolved (excluding a recurrence or progression of disease). This may be as a result of the treatment, the disease process, or both. Examples of late effects include infertility, hyperthyroidism, fatigue, scoliosis and cognitive impairment.
