Episode of admitted patient care—unplanned admission to Intensive Care Unit (ICU) following emergency surgery indicator, Yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Unplanned admission to ICU following emergency surgery
METEOR identifier:	592033
Registration status:	Health! , Standard 04/09/2015
Definition:	An indicator of whether a patient had an unplanned admission to an intensive care unit (ICU) following emergency surgery during an episode of admitted patient care, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Episode of admitted patient care—unplanned admission to Intensive Care Unit (ICU) following emergency surgery indicator
METEOR identifier:	592030
Registration status:	Health! , Standard 04/09/2015
Definition:	An indicator of whether a patient who had emergency surgery also had an unplanned admission to an intensive care unit (ICU) following the emergency surgery in the same episode of admitted patient care.
Object class:	Episode of admitted patient care
Property:	Unplanned admission to Intensive Care Unit (ICU) following emergency surgery indicator

Source and reference attributes

Submitting organisation:	Australian Commission on Safety and Quality in Health Care/Australian Institute of Health and Welfare

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no/not stated/inadequately described code N
METEOR identifier:	301747
Registration status:	Health! , Standard 21/09/2005 Housing assistance , Standard 10/02/2006 Community Services (retired) , Standard 14/02/2006 Early Childhood , Standard 21/05/2010 Homelessness , Standard 23/08/2010 Independent Hospital Pricing Authority , Standard 01/11/2012 Disability , Standard 07/10/2014 Indigenous , Standard 13/03/2015 Children and Families , Standard 22/11/2016
Definition:	A code set representing 'yes', 'no' and 'not stated/inadequately described'.

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 9 Not stated/inadequately described

This code is not for use in primary data collections.

Data element attributes

Collection and usage attributes

Guide for use: CODE 1 Yes

Code 1 is used where the patient had one or more unplanned admissions to the ICU following emergency surgery during an episode of admitted patient care.

Only unplanned ICU admissions that occur during an episode of admitted patient care following emergency surgery are included. Unplanned ICU admissions that occur preceding emergency surgery, preceding or following elective or other surgery, or during an episode of admitted patient care without any surgery are excluded.

Unplanned ICU admissions include unplanned admissions to High Dependency or Critical Care beds within an ICU.

Admissions to the ICU are excluded where the admission was planned and documented prior to the ICU admission (that is, for patients who are having complicated emergency surgery and are expected to require post-operative support and observations in an ICU).

CODE 2 No

Code 2 is used where the patient did not have any unplanned admissions to the ICU following emergency surgery during an episode of admitted patient care.

CODE 9 Not stated/inadequately defined

Code 9 is used where it is not clear or there is inadequate documentation in the primary data collection to establish whether or not the patient had one or more unplanned admissions to the ICU following emergency surgery.

The data collected on unplanned ICU admissions should be linked to data collected on the episode of admitted patient care which contains other relevant information, for instance, patient demographics.

Comments: ICUs are designed for patients with the most severe and life-threatening illnesses and injuries, which require constant, close monitoring and support from specialist equipment.

Patients may be transferred to an ICU from another area of the hospital if they deteriorate rapidly. The rate of unplanned ICU admissions can be regarded as a measure of complications of care and should be interpreted in the context of other patient health-care safety and quality information.
