Lung cancer (clinical) NBPDS

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 599613

Registration status: [Health!](#), Standard 14/05/2015

DSS type: Data Set Specification (DSS)

Scope: The purpose of the Lung cancer (clinical) National best practice data set (NBPDS) is to define data standards for the national collection of lung cancer clinical data so that data collected is consistent and reliable. Collection of this data set is not mandated but it is recommended as best practice if clinical cancer data are to be collected. It will facilitate more consistent data collection while enabling individual treatment centres or health service areas to develop data extraction and collection processes and policies that are appropriate for their service settings.

The Lung cancer (clinical) NBPDS is used in conjunction with the Cancer (clinical) NBPDS. Mandatory reporting regulations have enabled population-based cancer registries in Australia to collect standard information on all incident cases of cancer apart from non-melanoma skin cancers, from which incidence, mortality and overall survival have been determined and trends monitored. The Cancer (Clinical) NBPDS provides a framework for the collection of more detailed and comprehensive clinical data such as stage of cancer at diagnosis, other prognostic characteristics, cancer treatment and patient outcomes.

The Lung cancer (clinical) NBPDS will support prospective data collection from the time a person with cancer symptoms is referred or first presents to a hospital or specialist through the entire duration of their illness.

The definitions used in this data set are designed to capture the provision of cancer care on a day-to-day level. They relate to the cancer care pathway and the need to optimise care by correctly diagnosing, evaluating and managing patients with cancer. In addition, end-points and patterns of care can be monitored to understand both the appropriateness and effectiveness of cancer care.

The data elements specified provide a framework for:

- promoting the delivery of evidence-based care to patients with cancer
- facilitating the ongoing improvement in the quality and safety of cancer management in treatment settings
- improving the epidemiological and public health understanding of cancer
- informing treatment guidelines and professional education
- guiding resource planning and the evaluation of cancer control activities

They will facilitate the aggregation of data across different treatment centres.

The underlying long-term goal is to provide data support to improve outcomes for patients by increasing the quality and length of life. For example, a comparison of the actual management of patients with best practice guidelines may identify shortfalls in treatment and limitations in access to treatment modalities for some patients.

Collection and usage attributes

Guide for use: The data elements in the Lung cancer (clinical) NBPDS with obligations described as mandatory or conditional for collection are recommended as best practice, while the data items described as optional are for collection at the discretion of the treating centre and may be contingent, for example, on the availability of resources.

Collection methods: This data set is primarily directed at the clinical and clinical epidemiological use of cancer data. Treatment centres such as hospitals, radiotherapy centres and cancer specialist practices are the settings in which implementation of the Lung cancer (clinical) NBPDS should be considered. The data set can also be used by a wider range of health and health-related establishments that create, use, or maintain records on health-care clients.

Metadata items in this Data Set Specification

Seq Metadata item
No.

Obligation Max
occurs

Seq No.	Metadata item	Obligation	Max occurs
1	Cancer treatment—distance of closest surgical margin, total millimetres N[N] <i>Conditional obligation:</i> Collect when a person with cancer has undergone surgery during their initial course of cancer treatment for the purpose of removing cancer (either invasive or in situ).	Conditional	1
2	Cancer treatment—lung cancer surgical margin qualifier, code N[N] <i>Conditional obligation:</i> Collect when a person with cancer has undergone surgery during their initial course of cancer treatment for the purpose of removing lung cancer (either invasive or in situ).	Conditional	1
3	Cancer treatment—radiotherapy target site for lung cancer, code N <i>Conditional obligation:</i> Collect when a person with cancer has undergone radiotherapy as part of their initial course of cancer treatment.	Conditional	1
4	Cancer treatment—residual (R) tumour indicator, yes/no code N <i>Conditional obligation:</i> Collect when a person with cancer has completed their initial course of cancer treatment.	Conditional	1
5	Cancer treatment—residual (R) tumour type, code AX <i>Conditional obligation:</i> Collect when a person with cancer has completed their initial course of cancer treatment.	Conditional	1
6	Health service event—first service contact date, DDMMYYYY <i>DSS specific information:</i> Use this data element to record the date a patient presents for the first time to a lung or cancer specialist. This consultation may occur prior to diagnosis so the specialist is involved in the diagnostic process or after the diagnosis of lung cancer has been made so the specialist is involved in the treatment of cancer. A lung or cancer specialist is defined as a consultant in any of the following specialties: respiratory medicine, cardio-thoracic surgery, clinical oncology, medical oncology and radiation oncology.	Conditional	1
7	Patient—intention of treatment, code N <i>DSS specific information:</i> This item should be collected in relation to the initial course of treatment for cancer.	Mandatory	1
8	Person (address)—country identifier, code (SACC 2011) NNNN	Mandatory	1

Seq No.	Metadata item	Obligation	Max occurs
9	Person with cancer—basis of diagnostic investigation, code N	Mandatory	1
10	Person with cancer—clinical trial entry status, code N	Optional	1
11	Person with cancer—clinical trial identifier, text X[X(399)]	Conditional	99
	Conditional obligation:		
	Conditional on a person with cancer being accepted into a clinical trial.		
12	Person with cancer—comorbidities, Colinet defined comorbidities code N[N]	Mandatory	7
13	Person with cancer—date clinical trial entered, DDMMYYYY	Optional	1
14	Person with cancer—date of referral to palliative care services, DDMMYYYY	Conditional	1
	Conditional obligation:		
	Conditional on patient referral to palliative care services.		
15	Person with cancer—date of referral to psychosocial services, DDMMYYYY	Conditional	1
	Conditional obligation:		
	Conditional on patient referral to psychosocial services.		
16	Person with cancer—distant metastatic site(s) at diagnosis, topography code (ICD-O-3) ANN.N	Conditional	99
	Conditional obligation:		
	Conditional on the identification of distant metastasis at the time of diagnosis of cancer.		
17	Person with cancer—immunohistochemistry type, text X[X(49)]	Conditional	99
	Conditional obligation:		
	Conditional on immunohistochemistry type being coded as Other (88).		
18	Person with cancer—lung cancer immunohistochemistry type, code N[N]	Conditional	9
	Conditional obligation:		
	Conditional on immunohistochemistry testing being completed.		
19	Person with cancer—lung cancer molecular pathology test results, code N[N]	Conditional	14
	Conditional obligation:		
	Conditional on molecular profiling being performed for cancer.		
20	Person with cancer—lymphovascular invasion indicator, yes/no code N	Mandatory	1
21	Person with cancer—lymphovascular invasion type, code N	Conditional	3
	Conditional obligation:		
	Conditional on lymphovascular invasion having occurred.		
22	Person with cancer—molecular pathology indicator, yes/no/unknown code N	Mandatory	1

Seq No.	Metadata item	Obligation	Max occurs
23	Person with cancer—molecular pathology test date, DDMMYYYY	Conditional	99
	Conditional obligation: Conditional on molecular profiling being performed for cancer.		
24	Person with cancer—molecular pathology test results, (other) code X[X(19)]	Conditional	99
	Conditional obligation: Conditional on molecular pathology test results being coded as CODE 88 Other.		
25	Person with cancer—multiple primary tumours descriptor, code N	Conditional	1
	Conditional obligation: This data element is to be recorded if Person with cancer—multiple primary tumours indicator, yes/no code N indicates the presence of multiple primary tumours.		
26	Person with cancer—multiple primary tumours indicator, yes/no code N	Mandatory	1
27	Person with cancer—performance status score at diagnosis, Eastern Cooperative Oncology Group code N	Mandatory	1
28	Person with cancer—perineural invasion indicator, yes/no/not applicable/not stated/inadequately described code N	Optional	1
29	Person with cancer—psychosocial services type, code N[N]	Optional	1
30	Person with cancer—reason(s) second-line treatment administered, code N	Conditional	4
	Conditional obligation: Conditional on the administration of second-line treatment for cancer.		
31	Person with cancer—reason(s) treatment not administered, code N	Optional	6
32	Person with cancer—referral to palliative care services indicator, yes/no/unknown code N	Optional	1
33	Person with cancer—referral to psychosocial services indicator, yes/no/unknown code N	Mandatory	1
34	Person with cancer—second-line treatment intention, code N	Conditional	1
	Conditional obligation: Conditional on the administration of second-line treatment for cancer.		
35	Person with cancer—second-line treatment type, code N[N]	Conditional	5
	Conditional obligation: Conditional on the administration of second-line treatment for cancer.		
36	Person—asbestos exposure indicator, yes/no/unknown code N	Optional	1
37	Person—asbestos exposure setting, code N	Conditional	1
	Conditional obligation: Conditional on the person having known exposure to asbestos.		

Seq No.	Metadata item	Obligation	Max occurs
38	Person—diagnostic imaging type, lung cancer code N[N]	Optional	16
39	Person—Individual Healthcare Identifier, N(16)	Mandatory	1
40	Person—lung cancer diagnostic procedure type, code N[N]	Optional	20
41	Person—number of cigarettes smoked (per day), total N[N]	Conditional	1
	Conditional obligation:		
	Conditional on the person currently smoking tobacco daily or at least weekly, or smoking daily in the past.		
42	Person—tobacco product smoked, code N	Conditional	1
	Conditional obligation:		
	Conditional on the patient currently smoking tobacco daily or smoking daily in the past.		
43	Person—tobacco smoking duration (daily smoking), total years N[N]	Conditional	1
	Conditional obligation:		
	Conditional on the patient currently smoking tobacco daily or smoking daily in the past.		
44	Person—tobacco smoking quit age (daily smoking), total years NN	Conditional	1
	Conditional obligation:		
	Conditional on the patient not currently smoking but being a daily tobacco smoker in the past.		
45	Person—tobacco smoking start age (daily smoking), total years NN	Conditional	1
	Conditional obligation:		
	Conditional on the patient currently smoking tobacco daily or smoking daily in the past.		
46	Person—tobacco smoking status, code N	Mandatory	1
47	Person—unintentional weight loss indicator, yes/no/unknown code N	Mandatory	1
	DSS specific information:		
	This item should be recorded at diagnosis when recorded in the context of this NBPDS.
