Appointment—group session indicator, (derived) yes/no code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Group session indicator

Synonymous names: GROUP_SESSION_INDICATOR

METEOR identifier: 606299

Registration status: WA Health, Standard 01/06/2017

Definition: An indicator for health services that are provided to two or more patients by the

same health care provider(s) at the same appointment, as represented by a code.

Data Element Concept: Appointment—group session indicator

Value Domain: Yes/no code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Boolean

Format: Naximum character length: 1

Value Meaning

Permissible values: 1 Yes

2 No

Data element attributes

Collection and usage attributes

Guide for use:This data item is a mandatory item for national reporting against the data element:

Non-admitted patient service event-group session indicator, yes/no code N

Collection methods: The appointment session type code in the NAPAAWL DC is used to derive the

group session indicator.

Records with a value of GRP for the appointment session type code will be assigned a value of 1 for the group session indicator. All other records will be

assigned a value of 2 for the group session indicator.

Comments: An interaction between a clinician and a non-admitted patient can be in a group

setting with multiple patients but may not necessarily meet the criteria for a non-

admitted patient service event.
