Data Element Concept:	Dwelling—vacancy end date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Data element attributes

Collection and usage attributes

Guide for use:

In housing collections the vacancy start and end dates are used to measure the average time taken for tenantable vacant stock to be occupied by a tenant. The vacancy end date is the day that the next **household** starts their tenancy in the dwelling. However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy start date should be set equal to the date the previous household ended their tenancy.
