Relationship in household cluster (Indigenous community housing)

Exported from METEOR (AIHW's Metadata Online Registry)

Relationship in household cluster (Indigenous community housing)

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	608500
Registration status:	Housing assistance, Standard 30/08/2017
DSS type:	Data Element Cluster
Scope:	The purpose of the cluster is to determine relationships of **household** members, to other household members. Two indicators collect information on whether a household member is: • in a couple relationship with another household member • single/not in a couple relationship with another household member • a child residing in the household. This information is used in conjunction with other data items to determine whether overcrowding is present in the household, under the **Canadian National Occupancy Standard (CNOS).**
