# Prison entrant—self-assessed mental health status, general level of health code N

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Self-assessed mental health status
<b>METEOR identifier:</b>	618226
<b>Registration status:</b>	<a href="#">Health!</a> , Standard 28/04/2016
<b>Definition:</b>	The prison entrant's assessment of their own level of mental health, as represented by a code.

## Data element concept attributes

### Identifying and definitional attributes

<b>Data element concept:</b>	<a href="#">Prison entrant—self-assessed mental health status</a>
<b>METEOR identifier:</b>	618224
<b>Registration status:</b>	<a href="#">Health!</a> , Standard 28/04/2016
<b>Definition:</b>	The prison entrant's assessment of their own level of mental health.
<b>Object class:</b>	<a href="#">Prison entrant</a>
<b>Property:</b>	<a href="#">Self-assessed mental health status</a>

### Source and reference attributes

**Submitting organisation:** Australian Institute of Health and Welfare

## Value domain attributes

### Identifying and definitional attributes

<b>Value domain:</b>	<a href="#">General level of health code N</a>
<b>METEOR identifier:</b>	625903
<b>Registration status:</b>	<a href="#">Health!</a> , Standard 28/04/2016
<b>Definition:</b>	A code set representing self-assessed ratings of general levels of health.

### Representational attributes

<b>Representation class:</b>	Code
<b>Data type:</b>	Number
<b>Format:</b>	N
<b>Maximum character length:</b>	1

	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Excellent
	2	Very good
	3	Good
	4	Fair

	5	Poor
Supplementary values:	9	Unknown

## Collection and usage attributes

**Guide for use:** For use in Prisoner health data collections. If this value domain is used with other metadata then 'Unknown' would map to code 8.

## Data element attributes

### Collection and usage attributes

**Guide for use:** Self-assessed health status is a commonly used measure of overall health. While it may not always be equivalent to health status as measured by a medical professional, it does reflect a person's perception of his or her own health at a given point in time. Therefore, it is a useful measure of a person's current health status, as well as providing a broad picture of a population's overall health.

**Collection methods:** This standard question was developed by Picker Institute Europe and selected for use by the Patient Experience Information Development Working Group (PEIDWG) as part of the national set of core, common patient experience questions (CATI version) designed to be used for hospital patients. The question relating to this data element is as follows:

*STD-3:* In general, would you say your health is:

- excellent
- very good
- good
- fair
- poor.
