Emergency department stay—physical departure date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency department physical departure date
METEOR identifier:	621816
Registration status:	HealthI , Superseded 25/01/2018 Tasmanian Health , Superseded 22/05/2020
Definition:	The date on which a patient departs an emergency department after a stay, expressed as DDMMYYYY.
Context:	Emergency department care.
Data Element Concept:	Emergency department stay—physical departure date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Data element attributes

Collection and usage attributes

Guide for use: The episode end status should guide the selection of the value to be recorded in this field:

-
- If the service episode is completed without the patient being admitted, then record the date the patient's emergency department non-admitted clinical care ended.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the date the patient leaves the emergency department.
-
-
-
- If the patient was dead on arrival, then record the date the body was removed from the emergency department. If an emergency department physician certified the death of the patient outside the emergency department, then record the date the patient was certified dead.
- If the patient was registered, advised of another health care service, and left the emergency department without being attended by a health care professional, then record the date the patient leaves the emergency department.

Collection methods: Collected in conjunction with emergency department physical departure time.

Comments: This data element has been developed for the purpose of State and Territory compliance with the Australian Health Care Agreement and the agreed national access performance indicator.
