Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Individual session
	2	Group session
Supplementary values:	8	Unknown

Data element attributes

Collection and usage attributes

Guide for use:	<p>A service contact is regarded as an individual session where the service is provided for one patient/client with or without third party involvement. A service contact is considered to be a group session where the service is delivered at the same time to more than one client.</p> <p>A service contact where care delivery is reviewed and the patient/client is absent, such as a case conference or multidisciplinary review, is regarded as an individual session.</p> <p>A service contact is regarded as a group session where two or more patients/clients are participating in the service contact with or without third parties and the nature of the service would normally warrant dated entries in the clinical records of the patients/clients in question.</p> <p>A service contact is also regarded as a group session where third parties for two or more patients/clients are participating in the service contact without the respective patients/clients being present and the nature of the service would normally warrant dated entries in the clinical records of the patients/clients in question.</p>
