Person—need for assistance with activities in a life area, disability flag prisoner health code N

Exported from METEOR (AIHW's Metadata Online Registry)

Person—need for assistance with activities in a life area, disability flag prisoner health code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Assistance with activities (Standardised Disability Flag)
METEOR identifier:	631685
Registration status:	Health!, Standard 28/04/2016
Definition:	The level of help and/or supervision a person requires (or would require if the person currently helping/supervising was not available) to perform tasks and actions in a specified life area, as represented by a code.
Context:	The Standardised Disability Flag aims to identify people with activity limitations through a functional/needs assessment approach across specified activity and participation life areas.
Data Element Concept:	Person—need for assistance with activities in a life area
Value Domain:	Need for assistance disability flag prisoner health code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	**Meaning**
Permissible values:	1	Always/sometimes need help and/or supervision
	2	Have difficulty, but don't need help/supervision
	3	Don't have difficulty, but use aids/equipment/medications
	4	Have no difficulty
Supplementary values:	9	Unknown

Collection and usage attributes

Guide for use:

For use in Prisoner health data collections. If this value domain is used with other metadata then 'Unknown' would map to code 8.

Activity is limited when an individual, in the context of a health condition, either has need for assistance in performing an activity in an expected manner, or cannot perform the activity at all.

CODE 1   Always/sometimes need help and/or supervision
Always/sometimes need help and/or supervision is used when the person always needs or sometimes needs help or supervision in this life area.

CODE 2   Have difficulty, but don't need help/supervision
Have difficulty, but don't need help/supervision is used when the person has difficulty but does not need help or supervision in this life area.

CODE 3   Don't have difficulty, but use aids/equipment/medications
Don't have difficulty, but use aids/equipment/medications is used when the person does not have difficulty in this life area, but uses aids, equipment and/or medications.

CODE 4   Have no difficulty
Have no difficulty is used when the person has no difficulty in this life area and does not need help or supervision and does not use aids, equipment or medications.

Data element attributes

Collection and usage attributes

Guide for use:

This data element, along with [Person—activity and participation life area, disability flag code N](link), enables an assessment of a person's level of difficulty and need for assistance in life areas, leading to classification of level of activity limitation.

In the context of health, an activity is the execution of a task or action by an individual. An activity limitation is a difficulty an individual may have in executing an activity. Activity limitation varies with the environment, and is assessed in relation to a particular environment; the absence or presence of assistance, including aids, equipment and/or medications, is an aspect of the environment.

Collection methods:	This data element is designed for the whole mainstream population and should be used to collect information from the respondent, or a proxy/carer answering on their behalf. The responses are phrased in response to the question 'For each of the following activities, do you need help/supervision, have difficulty, or use aids/equipment/medications? (choose one answer for each row)'.

Where a life area includes a range of examples, (for example, 'Self-care' lists showering or bathing, dressing or undressing, toileting, eating food), if a person requires assistance in more than one of these areas, record the highest level of assistance needed.

Where need for assistance varies markedly over time (for example, episodic psychiatric conditions), record the average level of assistance needed.

Animals used for personal mobility (for example, guide dogs and companion animals) are considered to be aids and/or equipment. Also included in this category are prosthetic and orthotic devices, wheelchairs, transfer devices, etc.

For the 'Communication' life area, a person's level of difficulty is assessed in terms of whether they can understand, or be understood, in their native language or preferred method of communication. This can include both written and verbal communication and it does not refer to situations where the respondent can't read or write because they did not have an opportunity to access education. Interpreters for language are considered to provide personal assistance, and are not considered aids and/or equipment.

Comments:	Note that this is seeking to identify if, due to a long-term health condition or disability, a person cannot undertake everyday activities that other people in a similar age group would normally be able to carry out.
