Survey

Identifying and definitional attributes

Metadata item type:	Object Class
METEOR identifier:	637718
Registration status:	Health!, Standard 25/01/2018
Definition:	The collection of information about characteristics of interest from some, or all, units of a population using well-defined concepts, methods and procedures.
	Statistical surveys collect data to answer a question by placing a statistical value to an indicator or measure. Surveys measure one or more characteristics of the whole population or a sample of the population.
