Non-admitted patient event—group session status, yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Group session status
Synonymous names:	Group service event flag
METEOR identifier:	650414
Registration status:	Health! , Superseded 25/01/2018
Definition:	An indicator of whether a non-admitted patient service event was delivered in a group, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Non-admitted patient service event—group session status
METEOR identifier:	650416
Registration status:	Health! , Superseded 25/01/2018
Definition:	An indicator of whether a non-admitted patient service event was delivered in a group.
Object class:	Non-admitted patient service event
Property:	Group session status

Source and reference attributes

Submitting organisation: Independent Hospital Pricing Authority

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no/not stated/inadequately described code N
METEOR identifier:	301747
Registration status:	Health! , Standard 21/09/2005 Housing assistance , Standard 10/02/2006 Community Services (retired) , Standard 14/02/2006 Early Childhood , Standard 21/05/2010 Homelessness , Standard 23/08/2010 Independent Hospital Pricing Authority , Standard 01/11/2012 Disability , Standard 07/10/2014 Indigenous , Standard 13/03/2015 Children and Families , Standard 22/11/2016
Definition:	A code set representing 'yes', 'no' and 'not stated/inadequately described'.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N

Maximum character length: 1

	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 9 Not stated/inadequately described
This code is not for use in primary data collections.

Data element attributes

Collection and usage attributes

Guide for use: CODE 1 Yes

This code indicates care that has been provided to two or more patients by the same healthcare provider(s) at the same time.

A group must have two or more persons attending in the capacity of patients in their own right.

One service event is recorded for each patient who attends a group session.

Spouses, parents or carers attending the session are counted for the group session only if they are also participating in the service as a patient (see definition of a service event).

A group session may be delivered by more than one provider. This may be multidisciplinary care within one clinic appointment as part of a group, e.g. a group session jointly delivered by a physiotherapist and an occupational therapist.

In practice, this should be interpreted to mean that patients are receiving precisely the same services. For example:

- Patients may be part of a movement or hydrotherapy class where all participants are following the same intervention at the same time.
- Patients attending education sessions at chemotherapy or dialysis clinics are group sessions, if two or more people are receiving the same services at the same time.

CODE 2 No

This code indicates that care was delivered to the patient as an individual. An individual service event is provided to one person by one or more healthcare providers. For example:

- Where a clinician works one-on-one with several different patients in the same space over a period of time but each patient is following their own personalised program (for example, where several patients are scheduled to use the physiotherapy gym at once).
- Where multiple persons, such as several family members and carers, meet with a clinician to discuss one patient only.
- Patients attending for treatment at a dialysis or a chemotherapy clinic are receiving individual services.

The Non-admitted patient (NAP) data set is intended to capture instances of healthcare provision from the point of view of the patient. This may be for assessment, examination, consultation, treatment and/or education.

One service event is recorded for each interaction, regardless of the number of healthcare providers present.

Events broken in time:

The period of interaction can be broken but still regarded as one service event if it was intended to be unbroken in time. This covers those circumstances in which treatment during a service event is temporarily interrupted for unexpected reasons, for example, a healthcare provider is called to assess another patient who requires more urgent care. Where a healthcare provider is unable to complete the interaction, it is considered to be a service event only if the definition of service event (above) is met.

Setting:

Service events can occur in an outpatient clinic or other setting.

Mode:

Service events delivered via Information and Communication Technology (ICT) (including but not limited to telephone and where the patient is participating via a video link) are included if:

- they are a substitute for a face-to-face service event, and
- the definition of a service event (above) is met.

Accompanied patients:

If a patient is accompanied by a carer/relative, or the carer/relative acts on behalf of the patient with or without the patient present (e.g. the mother of a two-year-old patient, or the carer for an incapacitated patient), only the patient's service event is recorded unless the carer/relative interaction meets the definition of a service event (above).

Note: carer refers to an informal carer only.

Service events delivered in groups:

Care provided to two or more patients by the same service provider(s) at the same time can also be referred to as a group session.

One service event is recorded for each patient who attends a group session regardless of the number of healthcare providers present, where the definition of a service event (above) is met.

Service requests:

A service event is the result of a service request (including formal referral and self-referral or attendance at a walk-in clinic).

Activities which do not meet the definition of a service event include:

- Work-related services provided in clinics for staff.
- Non-attendances for a booked outpatient or booked outpatient services that did not go ahead.
