Address—statistical area, level 2 (SA2) code (ASGS 2016) N(9)

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Statistical area level 2 (SA2)
Synonymous names:	SA2
METEOR identifier:	659774
Registration status:	Children and Families , Standard 20/01/2021 Health! , Superseded 20/10/2021
Definition:	A designated region with a pre-determined population describing location which represents medium-sized general purpose area aggregated from whole Statistical areas level 1, as represented by a code.
Context:	The purpose of a Statistical area level 2 (SA2) is to represent a community that interacts together socially and economically.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Address—statistical area
METEOR identifier:	660651
Registration status:	Health! , Standard 06/12/2016 Early Childhood , Standard 24/07/2018 Children and Families , Standard 20/01/2021
Definition:	A designated region with a pre-determined population used for describing location.
Context:	Based on the Australian Statistical Geography Standard (ASGS) structure of six hierarchical statistical area levels comprised in ascending order: Mesh Block, Statistical Area Level 1, Statistical Area Level 2, Statistical Area Level 3, Statistical Area Level 4, and State and Territory. Each level directly aggregates to the level above.
Object class:	Address
Property:	Statistical area

Value domain attributes

Identifying and definitional attributes

Value domain:	Statistical area level 2 (SA2) code (ASGS 2016) N(9)
METEOR identifier:	659727
Registration status:	Tasmanian Health , Standard 27/06/2017 Early Childhood , Standard 24/07/2018 Children and Families , Standard 20/01/2021 Health! , Superseded 20/10/2021
Definition:	A code set representing a medium-sized general purpose area aggregated from whole Statistical areas level 1 (SA1s).

Representational attributes

Classification scheme:	Australian Statistical Geography Standard 2016
-------------------------------	--

Representation class: Code
Data type: String
Format: N(9)
Maximum character length: 9

Collection and usage attributes

Guide for use: SA2 coding structure:

An SA2 is identifiable by a 9-digit fully hierarchical code. The SA2 identifier is a 4-digit code, assigned in alphabetical order within a Statistical area level 3 (SA3). An SA2 code is only unique within a state/territory if it is preceded by the state/territory identifier.

For example:

State/territory	SA4	SA3	SA2
N	NN	NN	NNNN

Comments: There are 2,310 SA2 regions covering the whole of Australia without gaps or overlaps. These include 18 non-spatial SA2 special purpose codes, comprising Migratory–Offshore–Shipping and No Usual Address codes for each State and Territory.

The Other Territories of Jervis Bay, Cocos (Keeling) Islands, Christmas Island and Norfolk Island are each represented by a SA2 in the 2016 Australian Statistical Geography Standard.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Origin: Australian Bureau of Statistics 2016. [Australian Statistical Geography Standard \(ASGS\): Volume 1 - Main Structure and Greater Capital City Statistical Areas July 2016](#). ABS cat. no. 1270.0.55.001. Canberra: ABS.

Data element attributes

Collection and usage attributes

Comments: Data from the Australian Bureau of Statistics' (ABS) 2016 Census of Population and Housing will be available at SA2 level. The SA2 is the smallest area for the release of ABS non-Census and Intercensal statistics, including the Estimated Resident Population and Health & Vitals data. Whole SA2s aggregate to form Statistical areas level 3 (SA3). SA2s are also used to approximate Significant Urban Areas and Tourism Regions in the Australian Statistical Geography Standard (ASGS) Non-ABS Structures.
