	OPM	Ongoing patient management
	RET	Research trial
	TRE	Treatment / Intervention
Supplementary values:	OTH	Other
	NSP	Not specified
	UNK	Unknown

Data element attributes

Collection and usage attributes

Guide for use: The code OPM (ongoing patient management) can only be assigned to appointments where the referral was created in [TOPAS](#) or [webPAS](#). The OPM code can be used when a referral is received by a Health Service for ongoing management of the same condition.

Using this code will indicate that this appointment is not the first appointment for that referral and will enable the referral and appointment information to be excluded from any data that is used in reporting outpatient waiting times for the first attended appointment.

Relational attributes
