Value Meaning

Permissible values: ASS Assessment

CHR Chart review
EDU Education

OPM Ongoing patient management

RET Research trial

TRE Treatment / Intervention

**Supplementary values:** OTH Other

NSP Not specified
UNK Unknown

## Data element attributes

## Collection and usage attributes

**Guide for use:** The code OPM (ongoing patient management) can only be assigned to

appointments where the referral was created in TOPAS or webPAS. The

OPM code can be used when a referral is received by a Health Service for ongoing

management of the same condition.

Using this code will indicate that this appointment is not the first appointment for that referral and will enable the referral and appointment information to be excluded from any data that is used in reporting outpatient waiting times for the first attended

appointment.
