Episode end mode code N[N]

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	676232
Registration status:	Health! , Superseded 23/12/2020
Definition:	A code set representing the status and destination of a patient at the end of an episode of care or separation.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N[N]
Maximum character length:	2

	Value	Meaning
Permissible values:	1	Discharge/transfer to a hospital
	2	Discharge/transfer to a residential aged care service, unless this is the usual place of residence
	3	Discharge/transfer to other health care accommodation, unless this is the usual place of residence
	4	Discharge due to inactivity
	5	Discharge from leave
	6	Left against medical advice/discharge at own risk
	7	Other (including place of usual residence)
	8	Statistical discharge due to admitted care type change
	9	End of reference period
	10	Died
Supplementary values:	98	Unknown
	99	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 1 Discharge/transfer to a hospital

This code refers to the discharge/transfer of a patient to hospital (including acute or psychiatric whereby the patient physically leaves the facility. The transfer may be to a general ward or mental health ward.

CODE 2 Discharge/transfer to a residential aged care service, unless this is the usual place of residence

This code refers to a discharge/transfer to a residential aged care service, unless this is the usual place of residence. If the residential aged care service is the patient's place of usual residence, then they should have an episode end mode of Code 7.

CODE 3 Discharge/transfer to other health care accommodation, unless this is

the usual place of residence

This code refers to a patient discharge/transfer to other health care accommodation, including mothercraft hospitals and residential mental health care services. In jurisdictions where mothercraft facilities are considered to be acute hospitals, patients separated to a mothercraft facility should have an episode end mode of Code 1. If the residential mental health care service is the patient's place of usual residence, then they should have an episode end mode of Code 7.

CODE 4 Discharge due to inactivity

This code refers to the closing of an episode due to patient inactivity with the service provider. This code is only used in ambulatory mental health settings. For the purposes of activity based funding reporting, Code 4 is used after the episode of care has had a period of 120 days in which no service contact or event occurs.

CODE 5 Discharge from leave

This code refers to the administrative process by which a provider records the cessation of the episode of care while the patient is on leave. This includes an unplanned cessation of an episode of care while the patient is on leave, where there was a plan for the patient to return, however the patient did not return from leave. This value does not apply to the Ambulatory setting.

CODE 6 Left against medical advice/discharge at own risk

This code refers to a patient who leaves a mental health care service against medical advice or is discharged at their own risk.

CODE 7 Other (including place of usual residence)

This code includes discharges to other locations, including discharges to usual residence, own accommodation/ welfare institution (includes prisons, hostels, and group homes providing primarily welfare services). This includes the end of a concurrent short intervention stay where a resident returns to the original residential mental health service after a period of leave days. This code excludes discharge/transfer to other health care accommodation (Code 3) and residential aged care services (Code 2), unless they are the patient's place of usual residence.

CODE 8 Statistical discharge due to admitted care type change

This code is only to be used in admitted mental health settings when a care type has changed resulting in a statistical discharge but the patient has not physically left the hospital.

CODE 9 End of reference period

This code refers to the statistical end of a residential or ambulatory mental health care episode necessary at the end of a reporting period (i.e. calendar or financial year) where the patient has not been otherwise separated.

CODE 10 Died

This code refers to the closing of an episode due to the death of a patient.
