Emergency department stay—physical departure time, hhmm

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Emergency department physical departure time
METEOR identifier:	684600
Registration status:	Tasmanian Health , Standard 22/05/2020 Health! , Superseded 20/10/2021
Definition:	The time at which a patient departs an emergency department after a stay, expressed as hhmm.
Context:	Emergency department care.
Data Element Concept:	Emergency department stay—physical departure time
Value Domain:	Time hhmm

Value domain attributes

Representational attributes

Representation class:	Time
Data type:	Date/Time
Format:	hhmm
Maximum character length:	4

Source and reference attributes

Reference documents:	Standards Australia 2007. AS ISO 8601-2007 Data elements and interchange formats—Information interchange—Representation of dates and times. Sydney: Standards Australia.
-----------------------------	--

Data element attributes

Collection and usage attributes

Guide for use: The episode end status should guide the selection of the value to be recorded in this field:

-
- If the service episode is completed without the patient being admitted, then record the time the patient's emergency department non-admitted clinical care ended.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the time the patient leaves the emergency department.
-
-
-
- If the patient was dead on arrival, then record the time the body was removed from the emergency department. If an emergency department physician certified the death of the patient outside the emergency department, then record the time the patient was certified dead.
- If the patient was registered, advised of another health-care service, and left the emergency department without being attended by a health-care professional, then record the time the patient leaves the emergency department.

Collection methods: Collected in conjunction with emergency department physical departure date.

Comments: This data element has been developed for the purpose of State and Territory compliance with the National Healthcare Agreement and the agreed national access performance indicator.
