### Data element attributes

## Collection and usage attributes

#### Guide for use:

Collection of this data element should be preceded by the collection of the data element Person—student/employment training indicator, code N.

Because reference periods may vary it is possible that more than one category of the Value Domain may be a valid response to a question on student type. For example over a number of months a student may move from primary to secondary education. Therefore it is preferable for this Data Element to refer to a specific point in time rather than a period of time. When a period of time is referenced it should be precisely specified.

**Collection methods:** The permissible values for this data element are used to form the response

categories to the question:

"Which category below best describes your education or training status?"
