| | Description: | This indicator set contains the specifications for the 2018 Key Performance Indicators for Australian Public Mental Health Services (Jurisdictional level version) (MHS KPIs). |

Description: This indicator set contains the specifications for the 2018 Key Performance Indicators for Australian Public Mental Health Services (Jurisdictional level version) (MHS KPIs).

These indicator specifications facilitate the supply and publication of jurisdictional level data, which is compiled to form the national view. The specifications are adapted from the related Key Performance Indicators for Australian Public Mental Health Services (Service level version) (2018), which is an ongoing data development process.

As a key part of the ongoing data development, the key performance indicators are regularly reviewed to ensure they continue to be fit for purpose. At the most recent review (2017) it was agreed one indicator—MHS KPI 14—was no longer required for inclusion in the Jurisdiction level specifications for national reporting. This indicator is included in the Service level version 2015–2017.

The number and data collection period for each indicator is summarised in the table below for reference.

Indicator number	Indicator name	Data set collection period
KPI 01	Change in mental health consumer's clinical outcomes	2016–17
KPI 02	Mental health readmissions to hospital	2016–17
KPI 03	National Mental Health Service Standards compliance	2016–17
KPI 04	Average length of acute mental health inpatient stay	2016–17
KPI 05	Average cost per acute mental health admitted patient day	2016–17
KPI 06	Average treatment days per three-month community mental health care period	2016–17
KPI 07	Average cost per community mental health treatment day	2016–17
KPI 08	Population access to specialised clinical mental health care	2016–17
KPI 09	Mental health new client index	2016–17
KPI 10	Comparative area resources	Not yet specified for national reporting
KPI 11	Pre-admission community mental health care	2016–17
KPI 12	Post-discharge community mental health care	2016–17
KPI 13	Mental health consumer outcomes participation	Not yet specified for national reporting
KPI 14	Outcomes readiness	Removed from the set in 2017
KPI 15	Seclusion rate	2017–18
KPI 16	Restraint rate	2017–18 Added to the set in 2018

Collection and usage attributes

National reporting arrangement:	Indicators are collected and reported annually in accordance with an agreement reached by the Mental Health Drug and Alcohol Principal Committee.

The following indicators cannot be sourced from existing national data collections. Data is requested and supplied annually from jurisdictions:

- *Mental health readmissions to hospital*
- *Population access to specialised clinical mental health care*
- *Mental health newclient index*
- *Pre-admission community mental health care*
- *Post-discharge community mental health care*.

Change in consumer's clinical outcomes is sourced from the National Outcomes and Casemix Collection data set.

The following indicators are calculated from national data sets; data is supplied in accordance with the Community Mental Health Care and the Mental Health Establishments National Minimum Data Sets:

- *National Mental Health Service Standards compliance*
- *Average length of acute mental health inpatient stay*
- *Average cost per acute mental health admitted patient day*
- *Average treatment days per three-month community mental health care period*
- *Average cost per community mental health treatment day*.

Seclusion rate and *Restraint rate* data are supplied in accordance with the Mental health seclusion and restraint National best endeavours data set.

Comments: Glossary terms that are relevant to this indicator set include:

Admitted patient mental health care service

Ambulatory mental health care service

Brief ambulatory episode of mental health care

Brief inpatient episode of mental health care

Community mental health care treatment day

Episode of care

Separation

Specialised mental health service
