# Episode of care—behaviour-related risk factor intervention, code NN

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Behaviour-related risk factor intervention
<b>METEOR identifier:</b>	696232
<b>Registration status:</b>	<a href="#">HealthI</a> , Standard 17/10/2018
<b>Definition:</b>	The intervention within an episode of care taken to modify or manage a patient's behaviour-related risk factor(s), as represented by a code.
<b>Data Element Concept:</b>	<a href="#">Episode of care—behaviour-related risk factor intervention</a>
<b>Value Domain:</b>	<a href="#">Behaviour-related risk factor intervention code NN</a>

## Value domain attributes

## Data element attributes

### Collection and usage attributes

<b>Guide for use:</b>	More than one code can be recorded.
<b>Comments:</b>	To enable analysis of the interventions within an episode of care, in relation to the outcome of this care, especially when linked to information on risk factors. The recording of Clinician's management interventions is critical information for health service monitoring, planning and patient outcomes. It is a major descriptor of the care provided throughout an episode of care.
