Geographic remoteness

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	697108
Registration status:	Health! , Standard 06/09/2018 Housing assistance , Standard 10/05/2019
Definition:	The remoteness of a location, based on the road distance to the nearest urban centre and its population size.
Context:	Geographic remoteness is essentially a measure of a physical location's level of access to goods and services. Large population centres tend to have a greater range of goods and services available than small centres. Typically, a population centre is not likely to provide a full range of goods and services until its population reaches around 250,000 people.
Property group:	Location characteristics
