National Healthcare Agreement: PI 32–Patient satisfaction/experience, 2019

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 32–Patient satisfaction/experience, 2019
METEOR identifier:	698872
Registration status:	Health! , Superseded 13/03/2020
Description:	Nationally comparative information that indicates levels of patient satisfaction around key aspects of the care they received.
Indicator set:	National Healthcare Agreement (2019) Health! , Superseded 13/03/2020
Outcome area:	Patient Experience Health! , Standard 07/07/2010

Collection and usage attributes

Population group age from:	15 years
Computation description:	Population is limited to persons aged 15 and over. Analysis by remoteness and Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) is based on usual residence of the person. Presented as a percentage.
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$, calculated separately for each of (a) to (i) below.

Numerator:

- (a) Number of persons aged 15 and over who saw a general practitioner (GP) (for their own health) in the last 12 months who reported that they waited longer than felt acceptable to get an appointment.
- (b) Number of persons aged 15 and over who were referred to a medical specialist by a GP in the last 12 months who waited longer than they felt acceptable to get an appointment.
- (c) Number of persons aged 15 and over who saw a GP (for their own health) in the last 12 months who reported that the GP always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).
- (d) Number of persons aged 15 and over who saw a medical specialist in the last 12 months (for their own health) who reported the medical specialist always or often: listened carefully to them; showed respect; and spent enough time with them (calculated separately for each category).
- (e) Number of persons aged 15 and over who saw a dental professional (for their own health) in the last 12 months who reported that the dental professional always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).
- (f) Number of persons aged 15 and over who visited a hospital emergency department (for their own health) in the last 12 months who reported that the ED doctors or specialists always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).
- (g) Number of persons aged 15 and over who visited a hospital emergency department (for their own health) in the last 12 months who reported that the ED nurses always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).
- (h) Number of persons aged 15 and over who were admitted to hospital (for their own health) in the last 12 months who reported that the hospital doctors or specialists always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).
- (i) Number of persons aged 15 and over who were admitted to hospital (for their own health) in the last 12 months who reported that the hospital nurses always or often: listened carefully; showed respect; and spent enough time with them (calculated separately for each category).

Used for disaggregation by state/territory and remoteness

Comments:

Most recent data available for 2019 National Healthcare Agreement performance reporting: 2017–18 (total population: PEX); 2012–13 (Indigenous: AATSIHS).

Non-Indigenous data from PEX may not be directly comparable with data for Indigenous people from AATSIHS.

Some survey respondents may report pathology and imaging as a referral to a medical specialist.

Information about dental practitioners is obtained by asking survey respondents about services received from a dental professional. Examples of dental professionals given to survey respondents in the questionnaire are dentists, dental hygienists and dental specialists. The intention is that survey respondents should provide information about all dental professionals, which may additionally include such practitioners as dental therapists, oral health therapists, and dental prosthetists, as well as specialists such as orthodontists, periodontists and endodontists.

Responses from proxy interviews are not counted for questions on personal opinions.
