It is to be used solely for this purpose.		
	When stipulated in a data specification, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.		
	Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.
