Elective surgery waiting list episode—overdue patient status, code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Overdue patient status

METEOR identifier: 716057

Registration status: Tasmanian Health, Standard 16/06/2020

Health!, Superseded 05/02/2021

Definition: Whether the wait time of a patient on an elective surgery waiting list has exceeded

the time that has been determined as clinically desirable in relation to the urgency

category to which they have been assigned, as represented by a code.

Context: <u>Elective surgery</u>

Data Element Concept: Elective surgery waiting list episode—overdue patient status

Value Domain: Overdue patient status code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N
Maximum character length: 1

Value Meaning

Permissible values: 1 Overdue patient

2 Other

Data element attributes

Collection and usage attributes

Guide for use: This metadata item is required for patients in all <u>Elective surgery waiting list</u>

episode—clinical urgency, code N categories. Overdue patients are those for whom the hospital system has failed to provide timely care and whose wait may have an adverse effect on the outcome of their care. They are identified by a comparison of Elective surgery waiting list episode—waiting time at removal, total days N[NNN] or Elective surgery waiting list episode—waiting time at a census date, total days N[NNN] and the maximum desirable time limit for the clinical

urgency category.

A patient is classified as overdue if waiting time at admission or waiting time at a census date is longer than 30 days for patients in clinical urgency category 1, 90 days for patients in clinical urgency category 2, or 365 days for patients in clinical

urgency category 3.

Comments: The number and proportion of overdue patients represent a measure of the

hospital's performance in the provision of elective hospital care.
