Admitted patient care NBEDS 2021-22

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 728441

Registration status: Health!, Superseded 17/12/2021

DSS type: Data Set Specification (DSS)

Scope: The purpose of the Admitted patient care national best endeavours data set (APC

NBEDS) is to collect information about care provided to admitted patients in

Australian hospitals.

The scope of the APC NBEDS is episodes of care for admitted patients in all public and private acute and psychiatric hospitals, free standing day hospital facilities and alcohol and drug treatment centres in Australia. Hospitals operated by the Australian Defence Force, corrections authorities and in Australia's off-shore territories may also be included. Hospitals specialising in dental, ophthalmic aids and other specialised acute medical or surgical care are included.

The scope of hospitals for which data are available may vary across jurisdictions.

Hospital boarders and still births are not included as they are not admitted to hospital. **Posthumous organ procurement** episodes are also not included.

Collection and usage attributes

Statistical unit: Episodes of care for admitted patients

Collection methods: Data are collected at each hospital from patient administrative and clinical record

systems. Hospitals forward data to the relevant state or territory health authority on

a regular basis (e.g. monthly).

National reporting arrangements

State and territory health authorities provide the data to the Australian Institute of

Health and Welfare for national collation, on an annual basis.

State and territory health authorities provide the data to the Independent Hospital

Pricing Authority for national collation, on a quarterly basis.

Implementation start date: 01/07/2021
Implementation end date: 30/06/2022

Comments:

There may be some variation across jurisdictions in the definition of admission time and separation time. This variation would need to be documented in

accompanying material regarding the data elements.

Interaction with the Admitted patient care National Minimum Data Set (APC

NMDS) 2020-21

The APC NMDS and APC NBEDS work together to collect data on episodes of care for admitted patients.

It is intended that once the APC NBEDS is established, the data elements within the APC NBEDS will be integrated into the APC NMDS.

Glossary items

Glossary terms that are relevant to this NBEDS include:

Admission

Clinical intervention

Clinical review

Diagnosis

Elective surgery

Episode of acute care

Geographic indicator

Hospital boarder

Hospital-in-the-home care

Intensive care unit

Live birth

Neonate

Newborn qualification status

Organ procurement - posthumous

Resident

Residential mental health care service

Same-day patient

Separation

Mandatory

- Elective surgery waiting times cluster

Conditional 99

Conditional obligation:

This data element cluster is to be reported for patients on waiting lists for elective surgery, which are managed by public acute hospitals and have a category 1 or 2 assigned for the reason for removal from the elective surgery waiting list.

DSS specific information:

Establishment sector component of organisation identifier to be reported as:

- 1. Public (excluding psychiatric hospitals)
- 2. Private (excluding free-standing day hospital facilities)
- 3. Public psychiatric
- 4. Private free-standing day hospital facility

-	Elective care waiting list episode—listing date for care, DDMMYYYY	Mandatory	1
-	Elective surgery waiting list episode—clinical urgency, code N	Mandatory	1
-	Elective surgery waiting list episode—intended procedure, code NNN	Mandatory	1
-	Elective surgery waiting list episode—overdue patient status, code N	Mandatory	1
-	Elective surgery waiting list episode—reason for removal from a waiting list, code $\underline{\textbf{N}}$	Mandatory	1
-	Elective surgery waiting list episode—surgical specialty of scheduled doctor, code NN	Mandatory	1
-	Elective surgery waiting list episode—waiting time at removal, total days N[NNN]	Mandatory	1
-	Establishment—organisation identifier (Australian), NNX[X]NNNN	Conditional	1

Conditional obligation:

This is the establishment identifier of the contracting hospital and is reported for contracted patients only.

DSS specific information:

Establishment sector component of organisation identifier to be reported as:

- 1. Public (excluding psychiatric hospitals)
- 2. Private (excluding free-standing day hospital facilities)
- 3. Public psychiatric
- 4. Private free-standing day hospital facility
- Address—Australian postcode, code (Postcode datafile) NNNN

Mandatory 1

DSS specific information:

To be reported for the address of the patient.

- Contracted hospital care—organisation identifier. NNX(XINNNNN Mandatory 1 DSS specific information: Establishment sector component of organisation identifier to be reported as: 1. Public (excluding psychiatric hospitals) 2. Private (excluding free-standing day hospital facilities) 3. Public psychiatric 4. Private free-standing day hospital facilities 5. Public psychiatric 6. care, total {N[NN]}	-		Mandatory	1

Episode of admitted patient care—number of leave days, total N[NN]

Mandatory 1

DSS specific information:

For the provision of state and territory hospital data to Australian Government agencies:

(Episode of admitted patient care—separation date, DDMMYYYY minus Episode of admitted patient care—admission date, DDMMYYYY) minus Admitted patient hospital stay—number of leave days, total N[NN] must be greater than or equal to 0 days.

Episode of admitted patient care—patient election status, code N

Mandatory 1

 Episode of admitted patient care—procedure, code (ACHI 11th edn) NNNNN-NN Mandatory 99

DSS specific information:

As a minimum requirement procedure codes must be valid codes from the Australian Classification of Health Interventions (ACHI) procedure codes and validated against the nationally agreed age and sex edits. More extensive edit checking of codes may be utilised within individual hospitals and state and territory information systems.

An unlimited number of diagnosis and procedure codes should be able to be collected in hospital morbidity systems. Where this is not possible, a minimum of 20 codes should be able to be collected.

Record all procedures undertaken during an episode of care in accordance with the ACHI (11th edition) Australian Coding Standards.

The order of codes should be determined using the following hierarchy:

- procedure performed for treatment of the principal diagnosis
- procedure performed for the treatment of an additional diagnosis
- diagnostic/exploratory procedure related to the principal diagnosis
- diagnostic/exploratory procedure related to an additional diagnosis for the episode of care.

Episode of admitted patient care—referral source, public psychiatric hospital code NN

Conditional 1

Conditional obligation:

The data element is only required to be reported for episodes of care where the admitted patient spent time in a public psychiatric hospital.

Episode of admitted patient care—separation date, DDMMYYYY

Mandatory 1

DSS specific information:

For the provision of state and territory hospital data to Australian Government agencies this field must:

- be less than or equal to the last day of the financial year
- · be greater than or equal to the first day of the financial year
- be greater than or equal to Admission date.

Episode of admitted patient care—separation mode, code NN

Mandatory 1

Seq Metadata item Obligation Max
No. occurs

Episode of care—additional diagnosis, code (ICD-10-AM 11th edn) ANN{.N[N]} Conditional 99

Conditional obligation:

This data element is only to be reported if the episode of care results in more than one diagnosis code being allocated.

DSS specific information:

An unlimited number of diagnosis and procedure codes should be able to be collected in hospital morbidity systems. Where this is not possible, a minimum of 20 codes should be able to be collected.

- Episode of care—inter-hospital contracted patient status, code N Mandatory 1
- <u>Episode of care—mental health legal status, code N</u> Mandatory 1
- <u>Episode of care—number of psychiatric care days, total N[NNNN]</u> Mandatory 1

DSS specific information:

Total days in psychiatric care must be greater than or equal to zero;

Total days in psychiatric care must be less than or equal to Length of stay.

- Episode of care—principal diagnosis, code (ICD-10-AM 11th edn) ANN{.N[N]} Mandatory 1

Conditional obligation:

The principal diagnosis is a major determinant in the classification of Australian Refined Diagnosis Related Groups and Major Diagnostic Categories.

Where the principal diagnosis is recorded prior to discharge (as in the annual census of public psychiatric hospital patients), it is the current provisional principal diagnosis. Only use the admission diagnosis when no other diagnostic information is available. The current provisional diagnosis may be the same as the admission diagnosis.

- <u>Episode of care—source of funding, patient funding source code NN</u> Mandatory 1
- Establishment—Australian state/territory identifier, code N Mandatory 1

DSS specific information:

This data element applies to the location of the establishment and not to the patient's area of usual residence.

- Establishment—geographic remoteness, admitted patient care remoteness
 Classification (ASGS-RA) N
- <u>Establishment—organisation identifier (state/territory), NNNNN</u> Mandatory 1
- <u>Establishment—region identifier, X[X]</u> Mandatory 1

Seq Metadata item **Obligation Max** No. occurs Establishment—sector, code N Mandatory DSS specific information: To be reported as: 1. Public (excluding psychiatric hospitals) 2. Private (excluding free-standing day hospital facilities) 3. Public psychiatric 4. Private free-standing day hospital facility Hospital service—care type, code N[N] Mandatory 1 DSS specific information: Code 11 - Mental health care is not restricted to care provided by a specialised mental health unit. Injury event—activity type, code (ICD-10-AM 11th edn) ANN{.N[N]} Mandatory 99 DSS specific information: As a minimum requirement, the external cause codes must be listed in the ICD-10-AM classification. DSS specific information:

This field must not be null.

National minimum data sets:

For the provision of state and territory hospital data to Australian Government agencies this field must:

- be less than or equal to Admission date, Date patient presents or Service contact date
- be consistent with diagnoses and procedure codes, for records to be grouped.

-	Person—eligibility status, Medicare code N	Mandatory	1
-	Person—Indigenous status, code N	Mandatory	1
-	Person—labour force status, acute hospital and private psychiatric hospital admission code N	Conditional	1

Conditional obligation:

Only supplied for specialised mental health care patients.

- Person—labour force status, public psychiatric hospital admission code N Conditional 1

Conditional obligation:

Only supplied for specialised mental health care patients.

Seq Metadata item Obligation Max occurs

Person—marital status, code N Conditional 1

Conditional obligation:

Only supplied for specialised mental health care patients.

- Person—person identifier, XXXXXX[X(14)] Mandatory 1

- <u>Person—sex, code X</u> Mandatory 1

Person—weight (measured), total grams NNNN Conditional 1

Conditional obligation:

Weight on the date the infant is admitted should be recorded if the weight is less than or equal to 9,000 grams and age is less than 365 days.

DSS specific information:

For the provision of state and territory hospital data to Australian government agencies this metadata item must be consistent with diagnoses and procedure codes for valid grouping.

- Record—identifier, X[X(79)] Mandatory 1

DSS specific information:

In the context of the Admitted patient care NMDS, the Record identifier data element exists to aid with data processing. This data element is generated for inclusion in data submissions to facilitate referencing of specific records in discussions between the receiving agency and the reporting body. It is to be used solely for this purpose.

When stipulated in a data specification, each record in a data submission will be assigned a unique numeric or alphanumeric record identifier to permit easy referencing of individual records in discussions between the receiving agency and the reporting body. The unique record identifier assigned by the reporting body should be generated in a fashion that allows the associated data record to be traced to its original form in the reporting body's source database.

Reporting jurisdictions may use their own alphabetic, numeric or alphanumeric coding system.

This field cannot be left blank.

- <u>Episode of admitted patient care—admission time, hhmm</u> Optional 1

Episode of admitted patient care—separation time, hhmm Optional 1
