Primary Health Network—number of regular clients with a glycosylated haemoglobin measurement result recorded, total number N[NNNNNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Number of regular clients with a glycosylated haemoglobin measurement result recorded
Synonymous names:	Number of regular clients with a HbA1c measurement result recorded; Number of regular clients with a blood sugar level recorded
METEOR identifier:	728922
Registration status:	Health! , Recorded 05/01/2021
Definition:	The total number of people who are considered to be regular clients of service providers within a Primary Health Network at a given point in time and who have their glycosylated haemoglobin (HbA1c) measurement result recorded.
Data Element Concept:	Primary Health Network—number of regular clients with a glycosylated haemoglobin measurement result recorded
Value Domain:	Total number N[NNNNNN]

Value domain attributes

Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNNNNN]
Maximum character length:	7

Data element attributes

Collection and usage attributes

Comments:	<p>Glycosylated haemoglobin (HbA1c) is an index of average blood glucose level for the previous 2 to 3 months and is used to monitor blood sugar control in people with diabetes.</p> <p>The definition of a regular client can vary depending on the context and/or collection in which the term is being applied, but generally involves a minimum number of visits to an organisation or agency or uses of a facility, occurring over a specific period of time. For example, in the primary health care context a regular client may be someone who has visited a particular primary health care provider 3 or more times in the last 2 years.</p>
