Primary Health Network regular clients with chronic obstructive pulmonary disease cluster

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 730360

Registration status: [Health!](#), Recorded 05/01/2021

DSS type: Data Element Cluster

Scope: The Primary Health Network regular clients with chronic obstructive pulmonary disease cluster is intended for use within the Practice incentives program eligible data set NBEDS (PIP EDS NBEDS). These data elements are used in conjunction with each other to describe the total number of **regular clients** of service providers within a Primary Health Network who have been diagnosed with chronic obstructive pulmonary disease (COPD), disaggregated by sex, age range, and Indigenous status.

Collection and usage attributes

Guide for use: The four data elements are used together to provide a count of regular clients who have been diagnosed with chronic obstructive pulmonary disease (COPD), disaggregated by the various permutations of their sex, age ranges and Indigenous status, as demonstrated below:

Collection methods:

Data is collected for every [regular client](#) aged 15 years and over with a diagnosis of COPD recorded on their clinical record.

Age is derived from date of birth and taken as at the last day of the data collection period.

Disaggregations are as specified generally in the PIP EDS NBEDS.
