Public hospital service research activities cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	731543
Registration status:	Health! , Standard 05/02/2021
DSS type:	Data Element Cluster
Scope:	<p>The Public hospital service research activities cluster describes information relating to the research infrastructure, capability and activity within a public hospital service.</p> <p>Research refers to the activities undertaken in a public health service where the primary objective is the advancement of knowledge that ultimately aims to improve consumer and patient health outcomes and/or health system performance. The activity must be undertaken in a structured and ethical way, be formally approved by a research governance or ethics body, and have potential for application outside of the health service in which the activity is undertaken.</p> <p>For activity based funding purposes, the definition of research relates to the public health service's contribution to maintain research capability, excluding the costs of research activities that are funded from a source other than the state or territory or provided in kind.</p>

Collection and usage attributes

Guide for use:	The Public hospital service research activities cluster comprises three data elements that provide information on the number of full-time equivalent research directorate staff, number of peer reviewed articles published and number of approved research projects.
