Female—hypertensive disorder during pregnancy indicator, yes/no/not stated/inadequately described code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Hypertension during pregnancy indicator
METEOR identifier:	732753
Registration status:	Health!, Standard 03/12/2020
Definition:	An indicator of whether a female has a <u>hypertensive disorder during</u> pregnancy, based on a current or previous diagnosis, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Female—hypertensive disorder during pregnancy indicator
METEOR identifier:	733522
Registration status:	Health!, Standard 03/12/2020
Definition:	An indicator of whether a female has a <u>hypertensive disorder during</u> pregnancy, based on a current or previous diagnosis.
Object class:	Female
Property:	Hypertensive disorder during pregnancy indicator

Value domain attributes

Identifying and definitional attributes

Value domain:	Yes/no/not stated/inadequately described code N
METEOR identifier:	301747
Registration status:	Health!, Standard 21/09/2005 Housing assistance, Standard 10/02/2006 Community Services (retired), Standard 14/02/2006 Early Childhood, Standard 21/05/2010 Homelessness, Standard 23/08/2010 Independent Hospital Pricing Authority, Standard 01/11/2012 Disability, Standard 07/10/2014 Indigenous, Standard 13/03/2015 Children and Families, Standard 22/11/2016
Definition:	A code set representing 'yes', 'no' and 'not stated/inadequately described'.

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	Ν	
Maximum character length:	1	
	Value	Meaning

Permissible values:	1	Yes
	2	No
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:	CODE 9	Not stated/inadequately described
	This code	is not for use in primary data collections.

Data element attributes

Collection and usage attributes

Guide for use:	CODE 1 Yes
	To be reported if a female has a hypertensive disorder during this pregnancy, including where a female's hypertensive disorder is controlled through treatment during this pregnancy.
	CODE 2 No
	To be reported if a female does not have a hypertensive disorder during this pregnancy.
	CODE 9 Not stated/inadequately described
	To be recorded by data entry personnel (state/territory health authority) if the data field is left blank or is inadequately completed in the perinatal data collection form or extract. Clinicians should not record Code 9.
Collection methods:	Based on Society of Obstetric Medicine of Australia and New Zealand (SOMANZ) Guideline for the Management of Hypertensive Disorders of Pregnancy (Lowe et al. 2014), normal pregnancy is characterised by a fall in blood pressure, detectable in the first trimester and usually reaching a nadir in the second trimester. Blood pressure rises towards pre-conception levels by term.
	Hypertension in pregnancy is defined as:
	1. Systolic blood pressure greater than or equal to 140 mmHg and/or
	2. Diastolic blood pressure greater than or equal to 90 mmHg.
	Measurements should be confirmed by repeated readings over several hours.
	The diagnosis is preferably derived from and substantiated by clinical documentation which should be reviewed at the time of delivery. However this information may not be available in which case the patient may self-report to the clinician that they have been diagnosed with a hypertensive disorder.
	Jurisdictions that record perinatal data using the ICD-10-AM should apply the following codes: O10, O11, O13, O14.0–O14.9, O15.0–O15.9 and O16.
