Live birth

Identifying and definitional attributes

Metadata item type: Glossary Item

METEOR identifier: 733187

Registration status: [Health!](#), Standard 03/12/2020
[Indigenous](#), Standard 14/07/2021
[Tasmanian Health](#), Standard 24/12/2021

Definition: A live birth is defined by the World Health Organization to be the complete expulsion or extraction from the mother of a baby, irrespective of the duration of the pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached. Each product of such a birth is considered live born.

Context: Perinatal

Source and reference attributes

Submitting organisation: National Perinatal Data Development Committee

National Perinatal Data Advisory Committee.

Origin: National Health Data Committee

Reference documents: World Health Organization 2004. International Statistical Classification of Diseases and Related Health Problems, 10th Revision (ICD-10), 2nd edn. Geneva: World Health Organization.
