Female—antenatal mental health risk screening status, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Antenatal mental health screening status
METEOR identifier:	733468
Registration status:	HealthI , Standard 03/12/2020
Definition:	Whether a female has received screening for mental health risk using a validated screening tool during the antenatal period, as represented by a code.
Data Element Concept:	Female—antenatal mental health risk screening status
Value Domain:	Screening status code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Yes
	2	Not offered
	3	Declined
Supplementary values:	9	Not stated/inadequately described

Source and reference attributes

Submitting organisation: National Perinatal Data Development Committee

Data element attributes

Collection and usage attributes

Guide for use: Antenatal screening for mental health risk is conducted using a validated screening tool, which is an instrument that has been psychometrically tested for reliability, validity and sensitivity. For example the Edinburgh Postnatal Depression Scale (EPDS).

CODE 1 Yes

This value should be used if the female was screened using a validated screening tool.

CODE 2 Not offered

This value should be used if the female was not offered screening using a validated screening tool.

CODE 3 Declined

Screening for mental health risk was declined by the female.
